Principal Product Marketer at Super Green | Healthcare and clinical/technical products | Positioning, narrative, and 0-to-1 launches.

Experience

Super Green | Principal Product Marketer

August 24, 2026 to Present

- Super Green is a go-to-market studio for health-tech startups.
- Own narrative and positioning for health-tech clients, then partner with in-house creative to execute.
- Work includes positioning, sales decks, website messaging, case studies, and customer and technical content.

Clarity RCM | Head of Marketing (Founding Marketer)

San Francisco, California | Previous role, started 2025

- Founder-led sales built Clarity's early base with no marketing function. I built that function from scratch - positioning, messaging, brand narrative, and the foundational assets that carry it (website, sales decks, collateral) - plus the inbound and win-rate engine I built on top of that base: a 300% increase in qualified inbound, a 30% increase in win rate, and $7M in closed-won ARR (up 35% year over year).
- Launched The Practice Layer, a weekly healthcare-industry newsletter, built a fully automated AI content generation pipeline, and grew it from zero to over 5,000 subscribers at a 53% open rate (3x the 16% category benchmark). This channel generated over $1.5M in pipeline within the first 3 months.
- Managed a $150K events budget plus external vendors and agencies (PR, creative, video) to scale output without adding headcount, resulting in $3M ARR from new logos.
- Spotted a reporting gap for practice users, validated demand, and vibe-coded a working prototype dashboard; it secured engineering investment and a roadmap commitment.

Elation Health | Principal Product Marketing Manager

San Francisco, California | 2023 to 2025

- Led GTM for a 0-to-1 clinical AI scribe: turned a complex clinical product into clear positioning, packaging, and a launch narrative; scaled to $3M ARR in year one and established Elation's AI category presence in primary care.
- Owned end-to-end GTM for a new billing product launch: built positioning, sales enablement, demand motion, and customer marketing; drove the product to $5M ARR within 18 months - the company's second-largest revenue line, biggest product launch to date, and first strategic acquisition.
- Designed and rolled out a good-better-best pricing and packaging architecture that lifted attach rate nearly 40% and expanded ARPA roughly 1.75x within two quarters; the framework stayed in use after I left.

360training | Product Marketing Lead, Healthcare Vertical

Austin, Texas | 2022 to 2023

- Built the PMM function from zero to a team of four, and stood up the healthcare vertical's GTM and competitive-intelligence motion. The team overhauled B2B positioning, achieving 40% operating margin and $7M incremental ARR for the business unit.
- Owned GTM for an acquired HIPAA compliance exam product line, taking it to $10M ARR within 12 months as the fastest-growing line in the portfolio.

ExSite | Fractional Product Marketing

Austin, Texas | 2018 to 2022

- Directed end-to-end GTM and built reusable launch frameworks (positioning canvas, ICP methodology, messaging frameworks, launch-readiness checklists) for over 30 clients, adopted as their internal standards; generated 70%+ repeat and referral business.

Meta | Product Operations Analyst, Platform

Austin, Texas | 2016 to 2018

- Supported the launch and scaling of Facebook Gaming from 0 to 500K monthly active users: coordinated readiness across product, engineering, and ops, and resolved launch-blocking issues during the ramp.

Accenture | Financial Operations Analyst

Austin, Texas | 2015 to 2016

- Financial operations analyst on the Meta finance BPO (procure-to-pay analysis and reporting); converted into a full-time role at Meta.

Education

Purdue University - Electrical & Computer Engineering - West Lafayette, Indiana - 2014 to 2016.

Certificates

Core Product Marketing Manager (PMMC) - Product Marketing Alliance - 2022.

Core Competencies

- Product Marketing: Positioning & Narrative, Messaging, 0-to-1 Product Launches, Sales Enablement.
- Storytelling: Decks, Websites, Sales Collateral, Customer & Technical Content.
- AI-Native: Self-built multi-agent content systems, AI-powered GTM.
- Domain: Healthcare, RCM (revenue cycle management), EHR/EMR, clinical & technical products.

Selected projects

Humanizer | An open-source writing skill for reviewing AI-generated prose while preserving voice and facts.

Polysearch | A multi-source research pipeline with citation verification.

Thriftly | A map for finding thrift stores using neighborhood Census data and explainable scoring.
